

RYAN ABBOTT

Machine Learning Engineer | AI Engineer | Data Scientist

Oklahoma City, OK | Open to Dallas Hybrid / Remote | Top Secret Clearance
(214) 310-8836 | ryanabbott855@gmail.com | linkedin.com/in/ryan-abbott-6ba4b0233

AI/ML professional with 5+ years of experience designing, deploying, and scaling machine learning systems across energy, cybersecurity, government, and scientific domains. Proven track record delivering measurable business value through optimization, predictive modeling, cloud-native AI systems, and production data platforms. Generated multimillion-dollar cost savings through ML optimization, deployed enterprise services with 96%+ / 99%+ model performance, and built scalable solutions on AWS and Databricks.

CORE SKILLS

Machine Learning: Python, Scikit-learn, TensorFlow, PyTorch, Classification, Regression, NLP, LLM Fine-Tuning, Entity Resolution, Data Linkage, Forecasting, Optimization, Anomaly Detection

Cloud / MLOps: AWS, Databricks, Docker, GitHub Actions, CI/CD, EC2, ECR, S3, MLflow

Data Engineering: Spark, SQL, ETL, FastAPI, APIs, Lakehouse Architecture, Data Pipelines

Visualization / Tools: Power BI, Streamlit, React, Linux, Git

Languages: Python, SQL, C#, JavaScript, TypeScript, React, Kotlin, Java, C++, R

PROFESSIONAL EXPERIENCE

Independent Consulting — AI / ML Consultant

Oklahoma City, OK | Apr 2026 – Present

- Advised enterprise client on ontology architecture, knowledge graph design, and AI-ready data modeling for large-scale business systems.
- Delivered strategic recommendations for scalable knowledge base implementation supporting search, automation, and GenAI use cases.

Liberty Energy Inc. — AI / ML Software Engineer

El Reno, OK | Apr 2025 – Apr 2026

- Deployed production ML solution on Databricks achieving 96%+ accuracy and generating multimillion-dollar fuel-efficiency savings.
- Built optimization models to improve fleet performance while reducing fuel consumption across field operations.
- Led LLM fine-tuning initiative translating complex operational metrics into executive-friendly insights.
- Developed distributed Spark pipelines for telemetry analytics and large-scale model training.
- Designed predictive maintenance systems reducing downtime and preventing costly equipment failures.
- Built internal APIs on AWS using Docker, EC2, and ECR to support scalable AI applications.
- Implemented CI/CD workflows improving deployment speed, testing coverage, and release quality.

IntelliBridge, LLC — Data Scientist

Oklahoma City, OK | Jun 2023 – Apr 2025

- Built enterprise entity resolution platform using Python and FastAPI achieving 99% F1 score across person and company matching.
- Deployed containerized ML services to AWS for cross-team production usage.
- Developed anomaly detection models for cybersecurity log data to identify threats in near real time.
- Built Databricks lakehouse ingesting CloudWatch and CloudTrail telemetry for ML and analytics workloads.
- Delivered production data product supporting federal spending analysis and audit workflows.
- Built reusable validation frameworks improving data quality across multiple pipelines.
- Mentored junior analyst and led technical onboarding initiatives.
- Presented technical architecture to executives and engineering leadership.

University of Oklahoma — Research Assistant (Machine Learning)

Norman, OK | Aug 2022 – May 2023

- Designed TensorFlow CNN that doubled known rare quasar detections with 99%+ accuracy.
- Engineered terabyte-scale preprocessing pipelines for astronomical imaging data.

- Improved model performance through synthetic data generation and hyperparameter optimization.
- Presented findings to university faculty.

EDUCATION

University of Oklahoma

B.S. Astrophysics, Minor in Mathematics

Graduated with Distinguished Honors | GPA: 3.62

CERTIFICATIONS

- Databricks Generative AI Fundamentals
- Databricks AI Security Fundamentals
- Databricks Data Governance Fundamentals
- Databricks Lakehouse Fundamentals

PROJECTS

FeLoNet: Convolutional neural network for identifying rare quasars.

Android Mobile Application: Independently designed, developed, and published Kotlin/XML mobile app to Google Play Store.
